Know your School

Aryabhatta International Academy, a novel educational enterprise, aims to fill up the vacuum created due to lack of facilities for quality English Medium education in and around Yadgir district. The school will eventually be affiliated to the Council for the Indian School Certificate Examination under the ICSE / ISC pattern of education which is considered to be the best Education Board in the country today, This will be the first ICSE, ISC syllabus school in Yadgir. Aryabhatta International Academy will cater to the need of the day as a top-notch English-medium higher secondary school that imparts quality all round education to the children of Yadgir and surrounding districts of Karnataka. Dedicated to the proposition under the directive principles of our Constitution which grants unqualified right of education to all children, a number of merit-cum-means based scholarships will be instituted in the school from time to time. Our Aim is to create leaders, winners and achievers in a globally competitive world - good human beings who will help integrate India with the rest of the world.

Importance of a good school

The first education minister of independent India, late Shri Maulana Abdul Kalam Azad had said, "a good school is a national asset of the highest value at any place or at any time. Schools are the laboratories where future citizens are moulded, their intellects chiselled and sharpened. The quality of the products coming out of them will depend on the quality of these institutions." It is, therefore, of paramount importance that the education imparted in schools should be of the highest level of excellence. What we really need today is not just education, but more education; not that education with which one can buy a meal ticket, but one that caters to the wholesome, all-round development of the individual and the collectivity. To achieve this end, education imparted in schools should be student-centric, founded on the holistic conception of life and having in view the developmental aspects of a human being, viz. physical, cognitive, emotional, interpersonal, artistic, moral, psychic and spiritual.

*"A gate way to a
world of Unlimited
Opportunities"*

Know why we are different from others

We believe that the primary focus of the students should be to excel in their studies. This is their first contribution to the development of the nation. Education should instill in the minds of students the spirit of enquiry, critical thinking, creativity and selflessness that turns them into autonomous learners or self-directed, self controlled lifelong learners. Our main aim is to build character, human values and confidence in children. Technology enhanced learning is the need of the day and we are committed to provide it.

*“ When Children Play,
the World Wins ”*

*“Taking
Life & Learning
beyond the Classroom”*

Vision

The school has the vision of a future which will be guided by the wisdom of the seers and to serve the ever-increasing glory of India in a new world where relationships are governed by the spirit of universal fraternity.

Mission

To support a model high quality international level school offering a cost effective, multi-dimensional and challenging educational programme for the young minds of the country. The school will strive to prepare children who have courage and heroism to demand from themselves tireless labour and inner discipline directed towards self-control and self-mastery. The school will leave no stone unturned in providing facilities and opportunities to students to develop strong and healthy bodies, clear and wide minds, resolute will power and ever-widening horizons of knowledge and even wisdom. The institution is dedicated to serve the highest interests of nation building that can ensure vast synthesis of knowledge and harmonious perfection of the individual and the collectivity.

Chairman's Message

When we think of education, it weaves a simple picture in our minds of a student learning and a teacher teaching but education is not just enrichment of the educand's intellectual capital. Education should be broad based, enduring and all-encompassing; it should cater to the harmonious development of the scholar's all-round personality which is the sum total of his physical, intellectual, mental, psychic, aesthetic and spiritual traits. Our main thrust should be on skill management. At Aryabhatta International Academy (AIA), the stress will be on scholastic growth and character formation through the amalgamation of the old with the new, and while latest methods incorporating technologically advanced pedagogy will be employed, our own rich culture, heritage and values will be the vehicles for advancement. English language, which is a window to the world at large, will be the medium of instruction here.

There are several short comings in to-day's model of education, but we believe that it is better to light one candle than curse the darkness. Here is quality education made available to the potential scholars of Yadgir and its neighbourhood at affordable prices almost at your door step. A committed and accredited school management willing to strain every nerve with complete philanthropic urge, highly qualified and experienced faculty, both academic and administrative, most modern educational technology and other facilities for grooming, and above all, a reputed public school principal who has donned his life for the upbringing of children and for whom education is not just a vocation but a philosophy of life, are waiting with open arms to receive your wards to introduce them to a novel experience in quality education.

Welcome to Aryabhatta International Academy to experience world class education with a difference. A new age school following the richest ICSC/ISE curriculum, most modern methods of pedagogy and the latest educational technology--all encapsulated in traditional Indian values await our stakeholders.

M. Sudhakar Reddy

Principal's Message

Today there is a ferment in education. The latest move of transferring learning experiences and outcomes to the learners has necessitated a paradigm shift in the mode of delivering educational transactions. The web era has opened immense possibilities both for the educator and the educand, with ERP and LMS helping both teachers and students alike to empower themselves. Schools are today not so much about knowledge as it is preparing students to live in a fast changing world where access to knowledge and technologies to learn are ubiquitous. The five C's--Collaboration, communication, critical thinking, creativity and choice levels--will be the sure currency of this new kingdom of holistic learning.

The dawn of the 21st century has seen a technological revolution in teaching and learning. Keeping pace with changes is the need of the hour lest we should be swept away by the undercurrents of our own evolutionary appetite. We have no idea of the emerging world after the next ten years, or for that matter, even five years hence. That world the present day toddlers will we entering into is likely to be totally different; still we are supposed to be educating them to enter that world of blogs, wikis, collaborations and critical thinking. The unpredictability is, therefore, mind boggling and beyond the confines of our present thought horizon.

Let us now come down to earth. Traditional chalk and talk methods have almost lost their relevance. White boards--smart boards-- that use touch detection for entering any field of accumulated knowledge, duly supported by soft wares of effective classroom management are the minimum need of the day. These empower teachers and students alike and have the power to create and enhance new proficiencies. World is today a global village where accessing information is just a 'Click' away. Mobile apps can grade and evaluate students while the entire world has shrunk into their palms and fingers. Under such a scenario, schools and institutions that deliver educational proficiencies have to upgrade their facilities to the optimum possible levels. It is here that **ARYABHATTA INTERNATIONAL ACADEMY** would be making a dent in its foray into education.

Technologically supported quality education has a price. But no price is high when it comes to the bright future of your precious possessions--your loving children -- whom you want to see well in life. Parents, you are cordially invited to share this unique educational experience available at Aryabhatta International Academy. It is in the confines of such institutions that the secure future of your children as also the destiny of the nation are shaped.

P. Aravindakshan

Mr. Aravindakshan with Dr. APJ Abdul Kalam

What we have in store for the children at Aryabhatta, Yadgir

The School is having extremely committed and qualified faculty that constantly strives to make learning a pleasurable experience for children and works to realize the potential of each child.

We ensure that the teachers constantly upgrade their professional skills through a multitude of in-house training programme along with workshops conducted by experts. Workshops and orientation on life skills, subject enhancement, effective stress management etc. go a long way in equipping them to strike an admirable balance between home and the workplace and achieve success in both spheres.

We have recruited the best staff members available in the market so that all activities of the school will go smoothly and the parents/students should not face any difficulty in their school related issues.

SMART CLASSROOMS

- To brings abstract and difficult curriculum concepts to life inside classrooms.
- To make learning an enjoyable experience for students.
- To improve academic performance.
- To enable instant formative assessment of learning outcomes in class.
- To enable teachers to instantly assess and develop the learning accessed by the students in class.

*“Leading the Young Minds
to a Glorious Future”*

Academics

Pre-Primary & Primary Nursery, Montessori (LKG), Prep (UKG) and Grades 1 to 4

We explore the world we live in through the eyes of children. We celebrate diversity and realize that every child is potentially divine, is a miracle, special and unique. We believe that high quality early learning experiences for our 2 to 5 year olds are vital as they lay the foundations for a lifetime's love for learning.

Our curriculum is based on latest brain research and pedagogy. Bloom's Taxonomy on learning levels, Howard Gardner's Theory on artificial intelligence and Neil Fleming's VARK Theory of learning styles are the main tenets that embody the curriculum at this stage. The most effective steps that are to be employed to receive training are Create, Evaluate, Analyse, Apply, Understand and Remember.

Middle Grade 5 to 8

Association of ideas through interdisciplinary approach, poems, stories, mnemonics, music and rhythm are intensively used in these grades for retention of information. Audio-Visual aids, smart boards, films and film strips stimulate attention and accelerate learning.

Secondary & Higher Secondary Grade 9 to 12

We instruct the students to take a break between learnings after a few hours of studying since this time is essential to relax the minds of the children. Not only breaks but physical exercise and sound sleep strengthen the ability to retain information. Sleep is very crucial to boost the student's memory. Sleep helps them to learn new information and pass the information to the long-term memory. Stresses and strains are too common at this stage, parental and peer pressures raising expectancy levels. Relaxation, games/ sports, outward bound school programme and entertainments are extremely useful in overcoming stress related problems.

Asking questions like why, how, what helps in learning concepts well because here the reasoning, thinking and analytical powers are involved. Anything which triggers our mental processors to action helps in learning the concepts faster and better. Finding answers to these questions makes memory work out, as all the mental processors are involved making the memory charged and active.

Sports

Magical effect of Sports and Games

Sports and Games help the students to maintain physical and mental health, create the spirit of confidence, discipline, tolerance and esprit de corps. In view of this, we emphasize students to basic warm up and appropriate physical exercises like yoga and meditation to develop their skills in various outdoor and indoor games as follows:

- Chess, Caroms and Tables Tennis.
- Football, Badminton, Cricket, Volleyball and basketball.
- Martial Arts and Karate training.
- Athletics and Calisthenics.

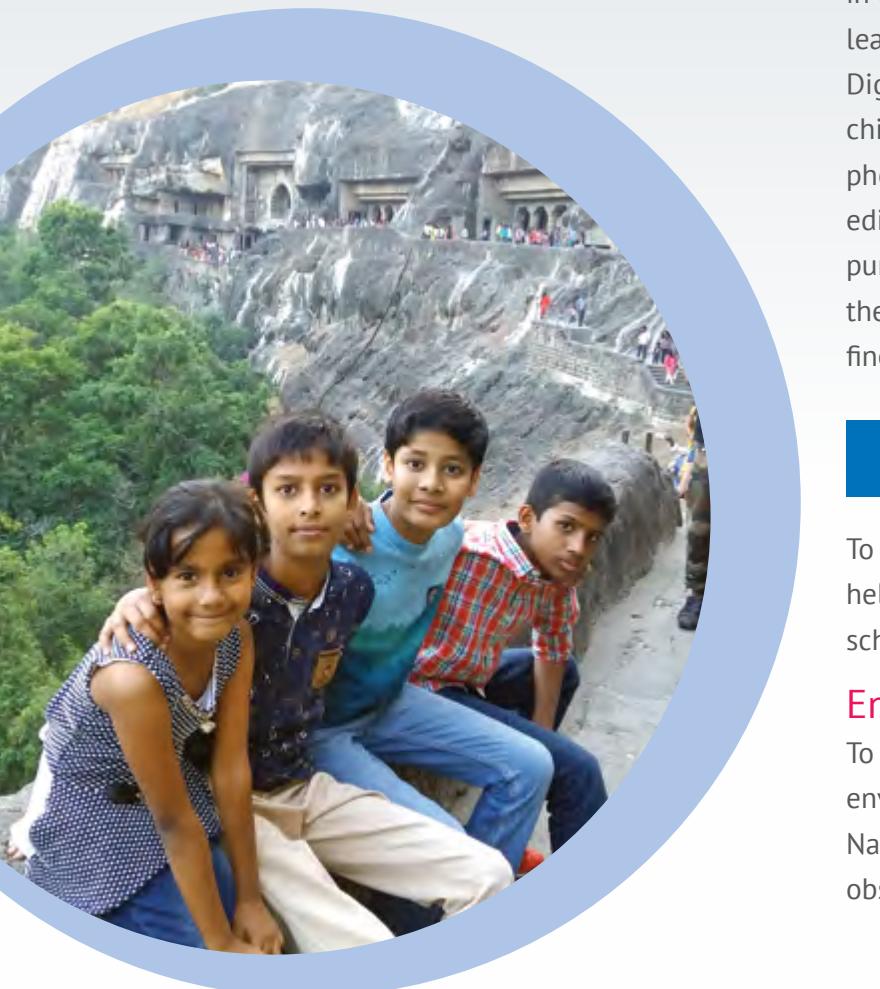

*“Individual talent wins games,
but intelligence with
teamwork wins championships”*

Beyond Academics

Activities

According to Howard Gardner's theory on multiple intelligences, every child is endowed with a range of capabilities and potentials which could be put to many productive uses. Realizing this, we give great importance to a wide spectrum of Co-curricular activities. We try to discover their inherent potentials in these beyond classroom experiences.

Performing Arts

Under the able guidance of talented and resourceful faculties, students are trained in the fields of Music, Dance and Theatre/Dramatics so that they can appreciate fine arts and perform well in competitions at different levels.

Photography

Photography will be a part of work experience in our school. In Photography the students will learn the basics of proper clicking and editing. Digital photography will be introduced and children will learn to give special effects to the photographs. The school has well equipped editing software and trained staff for this purpose. A photography club also functions in the school to make the students aware of the finer nuances of professional photography.

Clubs

To hone the special skills of the students that help them to live together in the community, the school has established various clubs:

Environment Club

To spread awareness concerning our environment, students are taken for guided Nature walk/study. Tree plantation week will be observed in the school every year.

Literary Club

Under the supervision of language teachers various literary club activities will be organized.

Dramatic Club

To teach the students the nuances of theatre, eminent theatre personalities associated with the National School of Drama will be invited to hone the skills of the students.

Dance Club

To train students in Indian as well as Western forms of dance.

Music Club

To train the students in vocal/instrumental music and to teach them how to appreciate music.

WORKSHOPS & EXHIBITIONS

Various workshops will be organized in school every year to create awareness and to keep pace with the changing environment, viz., Health Management, Disaster Management, Drug Abuse Awareness, Personality Development, Serigraphic Print Workshops, Career Counselling Workshops, Stress Management, Exam Management, Time Management, Summer Workshop includes Computer Workshops, Modern and Western Music / Dance, Theatre, Sports and Calligraphy.

Outreach

Performing Arts

Farm activities in school help children to know of food options and nutrition and food-based education. Through the use of school and community gardens, it will contribute to healthy neighbourhoods where communities have a better understanding of how food is grown and how food affects their health and wellness.

Environment

Farm to school activities will support environmentally sound, sustainable and socially just approaches to food production, processing, packaging, transportation and marketing. It may promote an ecological and ethnic understanding among participants, develop infrastructure that supports healthy environments and promote agriculture and food distribution practices that mitigate harmful effects of climate change.

the school to make the students aware of the finer nuances of professional photography.

Swachh Bharat

"Swachh Bharat" is not about asking students to clean the environment, it includes cleanliness in all aspects and hence, we will ensure that our students maintain cleanliness within their school and home. We will teach them to ensure that they always wash their hands before and after their meal. Regular sessions will be conducted by doctors in our school to children. They would not only highlight the need for hygiene but also teach all simple methods to remain clean and this will make the children more enthusiastic about the need to follow proper health habits. Periodical dental and eye check ups will be held in the school.
